ENTERPRISE GIS SERVICES & TAX MAPPING

OFFERED BY **CIVIL SOLUTIONS**
geospatial services of ARH

CLOUD HOSTING

Civil Solutions accelerates time to users & reduces the risk of maintaining an in-house GIS infrastructure. From concept through implementation and day forward, we provide cloud-based systems that manage large numbers of clients, which are dynamically scaled for your business needs. Civil Solutions provides more than just designing, building, and operating your cloud-based systems: we provide strategic solutions based on trends & technology evolutions.
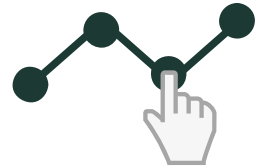

DATA CONVERSION

We are a leading provider of complete data migration & data conversion services. Our team has over 25 years of data conversion experience & technical expertise. This results in highly organized and effectively managed conversion, extraction, & implementation projects. Civil Solutions creates the migration plans, develops the data conversion programs, maps data conversion fields, validates the data, and oversees your successful implementation.
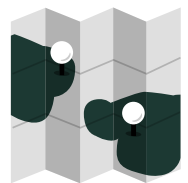

DATA DEVELOPMENT & MANAGEMENT

To be properly leveraged by our clients, data must be complete, accurate, secure, and readily available. Data integrity is crucial to driving business value, and Civil Solutions can help you develop a data warehouse from the ground up to turn your organization into an information-enriched environment that leverages data as a strategic asset.

DIGITAL TAX MAPPING

Civil Solutions created the first New Jersey State certified tax map using digital methods. We have established a methodology to prepare digital tax maps that both conforms to the NJ State Tax Map Regulations for certification & forms the foundation for our clients' GIS. We also establish a GIS base that can be used in various departments throughout the community to support a wide range of applications.

GIS IMPLEMENTATION & DESIGN SERVICES

Successful technology implementations are based upon executing policies & strategies developed to obtain your business needs & goals. Civil Solutions quickly identifies business goals & helps guide the direction of your organization. We design geospatial technology for sustained growth & offer business needs throughout the business life cycle. Our consultants have experience & proven capability to perform in all aspects of implementation & operational support.
